Winter Travel Tips

Driving

Make sure your vehicle is ready for driving in the winter. Have you had a winter safety check? Do you have a blanket and bottled water in case you get stuck?

Before travelling you need to ensure that you have cleared all of the snow off your vehicle, including the roof. We suggest using an indoor broom for the extra reach but without the scratching you'd get with an outdoor one! Make sure your lights are clean and visible and wait for the windscreen to clear completely before setting off.

Don't forget your one stop shop for all your sustainable transport needs. Check out www.tpc-rodgersleask.co.uk for a range of helpful advice. Simply scan this QR code to the right.

Electric Cars in
Winter

Updated Bus Times

Winter Festivities by Public Transport:

At Christmas time, why not hop on your local bus service to save some money on fuel. You can head to The Beeches bus stop just outside your estate where you can head to either Burton-upon-Trent via the 9 bus service, or to Leicester via the 29 / 29A bus service. There are Christmas Markets and shops for all the Christmas presents you need.

Whilst you're out shopping you can enjoy a mulled wine, knowing you don't have to drive home.

Current Bus Times
Your local bus timetable for the 29 / 29A service was updated on 22/10/2022 and is valid to 16/01/2023, please head scan the below QR code to view the latest timetable.

Electric Cars in Winter :

Did you know that electric cars are less efficient in winter?

Actually, that is less and less true as technology improves. The AA estimates that current Electric Vehicles are only slightly less efficient in winter than in summer, much like with a petrol vehicle.
